

The Terex Finlay tracked mobile conveyor range currently consists of two self-powered tracked options, 65ft and 80ft. Transport costs of each conveyor are kept to a minimum, due to the compact transport design, allowing them to be easily tracked in and out of a 40ft container and shipped globally. A simple yet robust design allows for easy setup and positioning to fit the customers' requirements. The 36.4.3kW (49hp) Deutz engine and powerful hydraulic drive deliver impressive capacities of up to 400tph. The design provides a full range of high specification options including full under belt and head drum guarding, radio control movement and setup where required.
